EDUCATION

LJ University

June 2022 – June 2026

Bachelor of Engineering in Computer Science and Technology

Gujarat, India

- **Relevant Coursework:** Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Computer Networks (CN), Programming in Python, Programming in Java, MERN Stack Development, AWS Cloud Computing.

EXPERIENCE

Full-Stack Developer

July 2025 – Present

RdFlex

Gandhinagar, India

- Developing both backend and frontend features for a multi-service web platform — Python (FastAPI / Odoo) REST APIs on the backend, React / Next.js workspace UI on the frontend.
- Built JWT/OAuth authentication flows with refresh tokens and cross-subdomain cookies; implemented CORS handling across multiple services and origins.
- Designed and optimized PostgreSQL schemas and queries for the platform's core instance-lifecycle data model; integrated external services via REST APIs.
- Containerized services with Docker and deployed to Kubernetes (Kind for local dev, DigitalOcean DOKS for production); automated image build/push and routing with Gateway API.

Python Developer Intern

Jan 2025 – June 2025

RdFlex

Gandhinagar, India

- Developed Python backend components for a business management platform serving manufacturing and retail clients; optimized PostgreSQL schemas and queries for production performance.
- Integrated third-party REST APIs for e-commerce and inventory-management use cases; participated in the full SDLC from specs and debugging to resolving production issues.

PROJECTS

LendLocal | *Next.js 14, Prisma, PostgreSQL (Neon), Stripe, Leaflet*

[Live Demo](#)

- Built a full-stack hyperlocal sharing platform end-to-end — OAuth authentication, user profiles, item/skill listings, bookings, and reviews.
- Integrated Stripe for payments and Leaflet for map-based discovery; designed the Prisma/Postgres schema covering users, listings, transactions, reviews, and moderation reports.
- Shipped to production on Vercel with Neon Postgres and Vercel Blob storage; wrote test flows for booking and payment journeys.

Near | *React 19, TypeScript, Vite, Firebase, WebRTC, Capacitor (Android), PWA*

- Built a real-time app for long-distance couples from a single React 19 + TypeScript codebase shipping to both web (installable PWA) and Android (Capacitor): chat, photos, voice notes, synced YouTube watch-together, shared albums, and a couple dashboard.
- Added WebRTC voice/video/sleep calls with Firestore signaling and end-to-end-encrypted secret chat; realtime data on Firestore, media on Cloudinary, push via Firebase Cloud Functions + FCM; code-split PWA (1.2 MB → 616 KB) deployed on Firebase Hosting.

Vrixo | *Next.js 14, FastAPI, Python, PostgreSQL, Celery, Redis*

- Building a full-stack AI photo platform: responsive Next.js 14 + Tailwind + shadcn/ui frontend with Supabase auth and Cloudflare R2 object storage.
- FastAPI backend with Celery + Redis queue for asynchronous image-processing jobs; SQLAlchemy + PostgreSQL for user data and job history.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C/C++, SQL (PostgreSQL), HTML/CSS

Frontend: React 19, Next.js 14 (App Router), Vite, Tailwind CSS, shadcn/ui, Material-UI, Leaflet, PWA, Capacitor

Backend: Node.js, Express.js, FastAPI, Django, REST API design, JWT / OAuth authentication, WebRTC

Databases & ORMs: PostgreSQL, MongoDB, Prisma, SQLAlchemy, Supabase, Neon, Firebase / Firestore

Infrastructure & Tools: Docker, Kubernetes (Kind, DOKS), Firebase (Cloud Functions, FCM), Git, GitHub, Vercel, AWS, Stripe, VS Code, PyCharm, IntelliJ
